

SHARP Pen Software Ver.3.8 Supplemental Instructions

This instruction describes the functions added after Ver.3.8.2.7.

■ About applicable models

- Added PN-CD701 to the applicable models.
- Added PN-L652B/PN-L752B/PN-L862B/PN-LA652/PN-LA752/PN-LA862 to the applicable models.
- Added PN-LC652/LC752/LC862 to the applicable models.
- Added PN-LM431/PN-LM551 to the applicable models.

PN-HW431T, PN-HW501T, PN-CD701	- The included touch pen can be as a passive pen. Normally passive pen is used "Finger can draw" enabled, but with this model, you can disable "Finger can draw" and enable "Select with Finger in Pen mode". - Can not draw simultaneously by multiple touch pens. - It does not support "Automatically Find Eraser".
PN-L652B, PN-L752B, PN-L852B, PN-LA652, PN-LA752, PN-LA852, PN-LM431, PN-LM551	- The included touch pen can be as a passive pen. Normally passive pen is used "Finger can draw" enabled, but with this model, you can disable "Finger can draw" and enable "Select with Finger in Pen mode". - Can not draw simultaneously by multiple touch pens. - The thick tip can be used as an "Eraser". The size will be the size of the last selected eraser in the menu. - It does not support "Automatically Find Eraser". Touching the screen with the palm acts as an eraser of the size last selected in the menu.
PN-LC652, PN-LC752	- The included touch pen can be as a passive pen. - "Finger can draw" cannot be disabled. - It supports "Automatically Find Eraser". Touching the screen with the palm acts as an eraser of the size corresponding to the touched area.

■ About supported OS

- The supported OS of this software is Windows 10 and Windows 11.
- In Windows 11, Three-finger and four-finger touch gestures have been added.
Simultaneous Drawing in this software may be recognized as a touch gesture of Windows 11.
- In Windows 11, you cannot use the "(Pen Software Printer Driver)" (refer to SHARP Pen Software Manual, p. 49).
We have made it possible to import PDF files as "Import images" through settings, so to import documents as images in Windows 11, please print using "Microsoft Print to PDF" instead of "Send print data to SHARP Pen Software", and then open the created PDF in Pen Software.
- When upgrading from Windows 10 to Windows 11, "Send print data to SHARP Pen Software" will remain as a printer.
There may be instances where applications crash when attempting to print preview to "Send print data to SHARP Pen Software". In such cases, please reinstall Pen Software.

■ About the first startup

If you install this software for the first time, you need to enter the serial number of your SHARP monitor when you first start it. (Not required when updating.)

The serial number can be confirmed on the rear of the monitor.

On some monitors, the serial number can be displayed on the screen in the following steps.

(Depending on the monitor. Also, some monitors cannot be displayed. For details, refer the monitor manual.)

- Press the INFORMATION button (or DISPLAY button) on the remote control unit. Confirm "S/N" of "INFORMATION".
- Touch "Settings" - "Device Information". Confirm "Serial number".

■ About the function to acquire an image from a multifunction machine

- In PN-SU01 upgrade edition, PDF is supported as the scan send format.

In PN-SU01 upgrade edition, you can acquire JPEG and PDF images.

- The setting for whether to paste large images after scale down them can be configured under "Settings" - "Object" - "Scale down large images".
- Set the method used to acquire images in "Settings" - "Object" - "Import images".

Basic	Operation	Default	Window	View	Sheet	Object
Other	Language	About				
Scale down large images			On Off			
Import images			Background Paste on entire sheet Paste with margins			
Object Recognition Time			0.5 sec. 1 sec. 2 sec. 4 sec.			
Restore Default Settings OK Cancel						

- The resolution of the PDF can be set under "Settings" - "Sheet" - "DPI when importing images."

Note: If the "Format when opening PDF files" is set to "Open as a sheet", the "DPI when importing images" cannot be changed. Please change the "Format when opening PDF files" to "Import images" before adjusting the "DPI when importing images" setting.

Basic	Operation	Default	Window	View	Sheet	Object
Other	Language	About				
Background of new sheet			Settings			
Size of new sheet			Screen Size 1920 x 1080 3840 x 2160			
When moving through sheets on the Overlay board, show captured desktop in background.			On Off			
Image format			png jpeg bmp			
Format when opening PDF files			Open as a sheet Import images			
DPI when importing images			200 400 600			
Restore Default Settings OK Cancel						

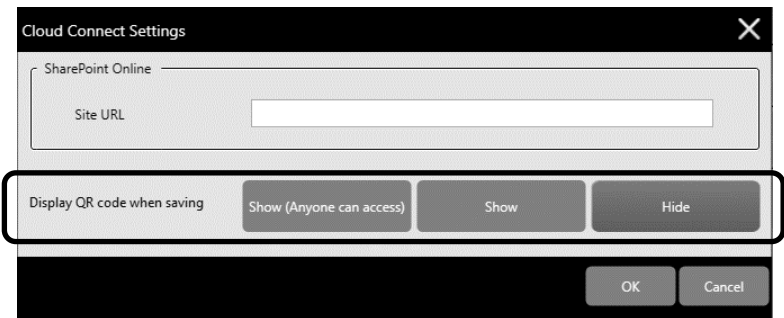

- An encrypted PDF file cannot be acquired.

■ **About saving and opening files**

- In PN-SU01 upgrade edition, when you save the file to cloud storage service, you can display the QR code of saved file URL.

- Set "Display QR code when saving" in "Settings" - "Other" - "Cloud Connect Settings".

Show (Anyone can access).. When saving is finished, the QR code of saved file URL will appear. Anyone can access the saved file URL. (Login not required.)

Show When saving is finished, the QR code of saved file URL will appear. Login is required as the creator to access the saved file URL.

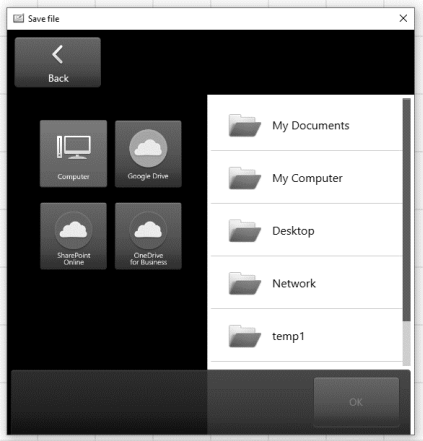

In "SharePoint Online" or "OneDrive for Business", it can be accessed even if a member of the same organization as the creator logs in.

Hide The QR code does not appear.

- You can set whether to display the folder history selected in “Open” or “Save”.
 - Set “Show recent folders” in “Settings” - “View”.
